Introduction

The VEKA and Halo FlushSash have been a popular choice with Fabricators for many years, and as the market increase of 88% shows, is increasingly popular with homeowners. To ensure our FlushSash remains at the forefront of the market we are introducing the FlushSash with Slim Sightlines.

The sleek FlushSash with Slim Sightlines offers the next level to homeowners with virtually no sightlines. Our patent pending concealed mullion ensures a slick looking window with all the modern benefits of PVC-u. Slim sightlines are usually found on timber windows making the FlushSash an ideal alternative or replacement to tired looking timber windows.

As well as fully welded options FlushSash can be mechanically jointed, ensuring they are virtually indistinguishable from timber windows to homeowners, especially when one of our industry leading Variations woodgrains are chosen.

So you can now offer a modern, traditional window with all the benefits of thermally efficient low maintenance PVC-u.

20% reduction in sightline dimensions increasing the glass area creating more light.

FlushSash

It's all in *the detail*.

Slim Sightline

Standard Sightline

Market info.

Since sales of Flush casement windows have been identified in their own right, the volume increase of their share of the market has been dramatic.

The 2017 Palmer Market Research report, Window, Door and Conservatory Markets in Housing in Great Britain, recorded an 88% increase in installations to a total of 335,000 frames annually, at the same time doubling the market share of Flush casements to 5%.

All indications based on historic patterns and current sales suggests that rapid rate of growth will continue. Within a market that is flat overall, Flush casements stand out as an attractive segment to service.

Q*

Thermal performance

Please find detailed calculations for FlushSash U-Values and Energy Ratings in the table below.

FlushSash can return an A rated casement window using an intermediate outer frame, and at its top specification can achieve an A+ (+17) rating.

The VEKA Group energy rating calculator

Ask a member of our Technical Team about

The VEKA Group's window and door energy performance calculator – BSI notified and BFRC certified.

The calculator is unique to each fabricator and their products, and allows for the generation of accurate SELs/DSELs in accordance with the BFRC and notified U-Values for CE Marking in accordance with EN 14351.
